Multiverse Software India

2017 - Present | Founder & CEO

Developed amazing applications in a variety of fields ranging from machine learning to understanding human nature. Doing all of these on my own ability has helped me develop management and leadership skills which have been a key factor in making me successful over the years

website: https://praharshbhatt.github.io/Portfolio/

skills: JAVA, Android, Visual Basic, C, C++, VBScript, Neural Networks, Flutter, Kotlin

Aapka Garagians

2018 - Present | Senior Developer & Project Manager

Working with a wonderful team at the startup Aapka Garage to help solve issues in the automobile industry

skills: Team management & Leadership

Gandhinagar Institute of Technology

2016 - 2020 | Bachelor's Degreee in Computer Engineering

Studying and implementing the concepts of computer engineering throughout my projects. Some of the core subjects include Analysis of Algorithms, Data Structures & Machine Learning. The 4 years at the institute had helped me shape myself into a promising professional for the future and helped me again a lot of experience from institute based projects too.

project: Fall detection by Deep Learning

Extreme Voice Assistant

A voice based AI assistant that helps in managing your tasks and activities. This is one of my finest projects and showcases my abilities in developing applications that make use of machine learning and understanding human nature. It has more than 1 million active users monthly and is the second most popular voice assistant after Google Assistant on the play store with more than 7 different languages

Aapka Garage

Providing online services to help with problems that arise while traveling with an automobile and maintaning it

Walldrox

A simple human - nature focused wallpaper application

Ullu

A fun meme generator and creator for the millennials

Doctorify

A machine learning based medical assistant

Trivia Quiz

An interesting fact based quiz game that can be played together with friends

achievements
